Texas Spine & Scoliosis welcomes fellowship-trained spine surgeon — Rory Mayer, MD

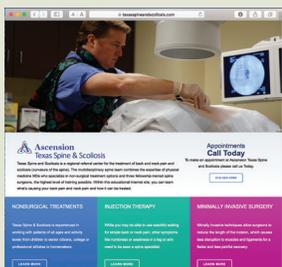

Dr. Rory Mayer is a dual fellowship-trained neurosurgeon with expertise in adult scoliosis and spinal deformity surgery. Before joining Texas Spine and Scoliosis in Austin, Dr. Mayer was affiliated with Baylor University Medical Center and Texas A&M College of Medicine in Dallas for two years with a practice focused on complex spine disorders, scoliosis and spine tumor surgery.

Dr. Mayer completed medical school at Baylor College of Medicine in 2012 and later became Chief Resident there in the Department of Neurosurgery. He completed a fellowship in Complex and Minimally Invasive Spine Surgery at the University of California San Francisco (UCSF) in 2020. Dr. Mayer also completed an enrolled fellowship in neurocritical care and spine trauma while at Baylor College of Medicine. He completed additional sub-specialty training in neurosurgical oncology and spine tumor surgery at the world-renowned MD Anderson Cancer Center in Houston and pediatric spinal deformity at Texas Children's Hospital. He has served as a clinical instructor in the Department of Neurosurgery at UCSF and has been a consulting neurotrauma surgeon to the National Football League.

Dr. Mayer specializes in the following areas:

- SPINAL DEFORMITY: Adult scoliosis, flatback syndrome, kyphosis.
- SPINAL TUMOR including metastatic disease to the spine.
- CERVICAL ARTIFICIAL DISC REPLACEMENT with the new Simplify artificial disc.
- SIMPLE & COMPLEX spine surgery, MIS surgery, revision spine surgery.

Dr. Mayer is accepting referrals accordingly. He will be based in the Austin main clinic on 32nd street. Referrals can be arranged by calling 512-324-3580. More information about Texas Spine and Scoliosis is available online at TexasSpineandScoliosis.com.

We have an on-line spine encyclopedia at TexasSpineandScoliosis.com with pain-relieving exercises, nonsurgical treatment options and symptom charts. The Internet site has videos, medical illustrations and patient success stories.

The spine surgeons are proficient in many of the FDA approved Artificial Discs for the cervical spine. Dr. Mayer uses the new Simplify Disc which is made of ceramic rather than metal to last longer and has different sizes which can benefit women.

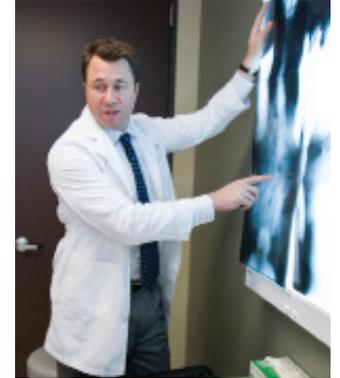

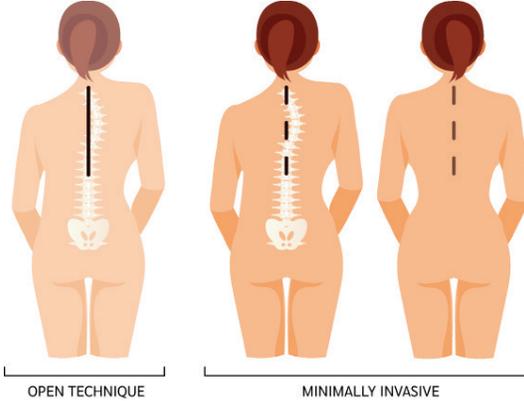

We send a free 36-page Home Remedy Book with pain-relieving stretches that help many people relieve pain symptoms at home. We also have a Symptom Chart that shows when a person needs to see a physician. We can send physicians 20 copies free for their patients. Physicians can request a copy by emailing TexasSpineandScoliosis@gmail.com.

Texas Spine & Scoliosis is one of only two spine centers in Texas to be included in SpineCenterNetwork.com — the only national listing of credentialed spine centers. To be included, a spine center must have board-certified spine surgeons and physical medicine physicians; spine therapists; and an emphasis on non-surgical options. It is also a Blue Distinction Center for spine surgery.

SURGERY TO CORRECT SEVERE SCOLIOSIS

When should a person consider scoliosis surgery to straighten a curve? It's a complex decision, because waiting too long carries increasing risks. That's because the spine is most flexible — and more receptive to correction — when the person is under 21 years of age. As a person gets older, the spine is less flexible and the scoliosis surgeon must be careful to not over-correct which could cause damage to the spinal cord and cause paralysis. The scoliosis surgeons at Texas Spine and Scoliosis use the most advanced instrumentation and fixation devices that untwist the spine. Instead of a long 10-inch incision, 3 small incisions are made to insert the instruments that untwist the spine. This greatly reduces disruption to muscles and ligaments, lessens blood loss and speeds return to activity with much less pain in recovery. Dr. Matthew Geck and Dr. Rory Mayer combine their expertise in orthopedics and neurosurgery for the best possible patient outcome.

Dr. Matthew Geck.

Texas Spine and Scoliosis

FELLOWSHIP-TRAINED SPINE SURGEONS

MATTHEW GECK, MD

**Board-certified Orthopedic Surgeon • Fellowship-Trained Spine Surgeon
Co-Chief, Texas Spine & Scoliosis**

Dr. Geck is a board certified orthopedic surgeon, fellowship-trained in spine surgery. He has performed more than 2,000 scoliosis surgeries and more than 100 mini scoliosis surgeries. Dr. Geck completed two fellowships in spine surgery, the first in adult and pediatric spine surgery at Jackson Memorial Hospital and a second fellowship at Miami Children's Hospital on scoliosis and kyphosis surgery. Dr. Geck is the co-founder of the SpineHope program, a non profit organization that transforms the lives of children with spinal deformities worldwide through surgery, education and research.

JOHN STOKES, MD

**Board-certified Neurological Surgeon • Fellowship Trained in Spinal Neurosurgery
Co-Chief, Texas Spine & Scoliosis**

Dr. Stokes is a board certified neurosurgeon, fellowship-trained in spinal neurosurgery with a practice 100% focused on spine surgery. He has performed more than 2,000 spine surgeries. He completed a fellowship at the Cedars Sinai Institute for Spinal Disorders in Los Angeles and UCLA. Dr. Stokes was a principal investigator in a FDA IDE (investigational device exemption) study of the Mobi-C artificial cervical disc.

EERIC TRUUMEEES, MD

Board-Certified Orthopedic Surgeon • Fellowship-Trained Spine Surgeon

Dr. Truumees is a board-certified orthopedic surgeon, fellowship-trained in spine surgery. Dr. Truumees has more than 20 years experience and specializes in cervical, thoracic and lumbar spine disorders. Dr. Truumees is a Professor of Orthopaedic Surgery at the University of Texas, Dell Medical School, and served as the 2020 President of the North American Spine Society. Dr. Truumees has published more than 150 peer reviewed articles and textbook chapters.

RORY MAYER, MD

Board-Eligible Neurological Surgeon • Fellowship-Trained Spine Surgeon

Dr. Mayer is a board-eligible neurosurgeon with dual fellowship training in complex and minimally invasive spine surgery and neurotrauma. He has additional sub-specialty training in neurosurgical oncology. He has been a consulting neurotrauma surgeon to the National Football League. He specializes in adult scoliosis and spinal deformity surgery.

NON-SURGICAL SPINE CARE

KUNJ B. AMIN, MD

**Fellowship trained in Interventional Spine & Musculoskeletal Medicine
Board-Certified Physical Medicine & Rehabilitation**

Dr. Amin is board certified in Physical Medicine and Rehabilitation and completed an Interventional Spine and Musculoskeletal fellowship at Texas Spine & Scoliosis. He is experienced in non-surgical, image guided spinal and musculoskeletal procedures. Dr. Amin has a special interest in Hip-Spine Syndrome in pregnant and postpartum patients.

ERIC MAYER, MD

**Board-Certified Physical Medicine & Rehabilitation
Fellowship-Trained in Spine Medicine**

Dr. Mayer is board-certified in Physical Medicine & Rehabilitation and in Sports Medicine. He completed a Fellowship in Interventional Spine & Musculoskeletal Medicine (ISMM) at the Cleveland Clinic. He has special expertise in clinical outcomes measurement systems, spinal interventional procedures, spine health, sports medicine and functional restoration.

LEE E. MOROZ, MD

Board-certified Physical Medicine & Rehabilitation

Dr. Moroz is board-certified in Physical Medicine and Rehabilitation. At Texas Spine & Scoliosis, Dr. Moroz specializes in helping patients return to activity without surgery. His focus of care is the diagnosis and assessment of back and neck pain problems. Dr. Moroz is proficient in pain relieving spinal injections.

ENRIQUE PENA, MD

**Board-Certified Physical Medicine & Rehabilitation
Fellowship-Trained in Interventional Spine • Musculoskeletal**

Dr. Pena is board-certified in Physical Medicine and Rehabilitation. Dr. Pena specializes in the non-surgical treatment of back and neck problems. Dr. Pena completed a fellowship in Interventional Spine, Musculoskeletal and Electrodiagnostic Medicine at The Spine Center at New England Baptist Bone & Joint Institute in Boston.
